

LUKA T.

Full-Stack PHP Developer

hello@plus8soft.com

SUMMARY

Highly skilled and results-driven Software Developer with over 7 years of experience specializing in planning, developing, and deploying scalable full-stack applications. Core expertise includes PHP (Laravel, Symfony), JavaScript/TypeScript, Next.js, and React, alongside robust backend database optimization using PostgreSQL and MySQL. Demonstrates strong technical foundation in microservices architecture (RabbitMQ, Docker), CI/CD pipeline optimization, REST APIs, and automated testing (TDD/BDD). Adept in Agile environments, driving code quality through rigorous code reviews, PSR-12/PSalm standards, and leading team technical discussions. Delivers tangible business value by accelerating performance, highlighted by a legacy application migration to Symfony that boosted system performance by 30%.

TECH SKILLS

Languages & Frameworks: PHP, Symfony 8.x, Laravel 12.x, JS/TS, React.js, Next.js, Vue.js, HTML5, CSS3, jQuery, Dart/Flutter

Backend & Architecture: Microservices, RESTful APIs, Clean Architecture, TDD, BDD, SOLID Principles, Design Patterns

Databases: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: AWS, GCP, Docker, CI/CD, Sentry

Other: RabbitMQ, Kafka, Redis, Memcached, Algorithms & Data Structures, User Behavior Analysis

WORK EXPERIENCE / PROJECTS

2025 - Present · Client Feature Development and API Integration

Developing new client features and ensuring safe deployment in production environments.

- Integrated new licenses for compliance with AML KYC regulations.
- Debugged production issues in real-time and set up logging systems.
- Optimized overloaded database tables for effective data filtering.
- Implemented a token authentication system for API authorization.
- Wrote comprehensive tests using Cypress and optimized GitHub workflows for faster deployment.

Skills: PHP, Symfony, MySQL, Docker, Sentry, Cypress

2025 · Legacy Application Migration

Migrated legacy PHP applications to Symfony 8.x, enhancing performance and maintainability.

- Improved application performance by 30% post-migration.
- Designed a scalable microservices architecture using RabbitMQ and Docker.
- Developed RESTful APIs ensuring ACID compliance with PostgreSQL.
- Achieved over 90% code coverage through unit and integration testing.

Skills: PHP, Symfony, RabbitMQ, Docker, PostgreSQL

2024 - 2025 · High-Performance PHP Application Development

Orchestrated the development and deployment of high-performance PHP applications.

- Promoted clean architecture principles to enhance code quality.
- Designed microservices for reliable inter-service communication.
- Optimized database performance while maintaining ACID compliance.
- Collaborated with DevOps to streamline CI/CD pipelines.

Skills: PHP, Symfony, Laravel, RabbitMQ, Docker, PostgreSQL, MySQL

2023 - 2024 · Scalable Microservices Architecture Implementation

Engineered scalable microservices architectures and optimized database operations.

- Implemented rigorous TDD/BDD practices for maintainability.
- Integrated Sentry for real-time error detection.
- Streamlined CI/CD pipelines for faster release cycles.

Skills: PHP, RabbitMQ, Docker, MySQL, PostgreSQL

2022 - 2023 · Complex Web Application Development

Developed complex web applications adhering to PSR-12 standards.

- Optimized database queries for performance.
- Established CI/CD pipelines for automated testing.
- Developed responsive front-end interfaces using React.js.

Skills: PHP, MySQL, PostgreSQL, Docker, React.js

EDUCATION

MSc in Computer Science - Georgian Technical University

LANGUAGES

English
